4/23/2020

Dear Resident:

E. Meier Contracting has been hired by the City of Des Peres to repair the concrete curbs and pave the asphalt street on your block. Please use caution in the work zone and comply with temporary construction signs and traffic barriers. ***Please pay special attention to temporary NO PARKING signs along the project.*** We will be replacing sections of the curb which may require closure of portions of the driving lane. If you have a dog fence or irrigation system, please help us by marking them in advance. Please turn your irrigation system off along the street to prevent water from flooding into the excavation & possibly delaying the project. We will try our best to avoid damaging them and will make repairs if necessary.

Once the curbs have been repaired, we will remove and replace the asphalt surface. During asphalt removal, we will have a moving lane closure and equipment working, but traffic will still be able to get through. On the day we install the new asphalt, the entire street will be shut down, but then reopened by the end of the day. More details will be posted on the website and signs as we get closer. We ask for your patience as our crews work. . There may be short delays at times as trucks are being loaded or unloaded. For updates throughout the project, please visit www.desperesmo.org/projects and click "Street Resurfacing"

Your driveway will be temporarily blocked due to the work. Please move vehicles out of your driveway and park outside the temporary No Parking Zones or your vehicle will be blocked by the repairs from _____ to _____.

Our crews will work to complete the project quickly while striving to minimize disruptions. Thank you for your understanding and patience as we complete the improvements in your neighborhood. If you have any additional questions, please contact Mike Rogan at E. Meier Contracting. Our employees will remove the barricades when the surface is safe to be driven/walked on.

Sincerely,
Mike Rogan
